

# CaribEx Worldwide Transports a Yacht

By: Chris Findlay

**We were contracted by a company in Brazil and Searay USA to handle the shipment of a 60' yacht from Port of Charleston to Sao Francisco do Sul port in South Brazil. The boat was being shipped for a boat show in Sao Paulo, Brazil. The shipment required the space of 3 flat racks onboard the vessel.**

**As a result of the success of our coordination, we are now handling our second 60' yacht as well as many smaller watercrafts. We coordinated US inland trucking, port storage, cradling of boat via crane, interport transport, as well as the international ocean shipping.**
